Compilation Instructions - Milestone 1

Use the CLI tool *run.py* as follows

```
python3 run.py [-h] --input INPUT [--output OUTPUT] [--verbose]
```

Here the INPUT refers to location of input python file, OUTPUT refers to location of output PDF file. The verbose flag if set outputs the logs of building the AST.

Relevant Details

Tabs are not converted to spaces in the program, and will lead to syntax error.

Tools used

1. GNU Bison
2. Flex
3. GCC
4. python (for CLI)
