Compilation Instructions - Milestone 1

Use the CLI tool *run.py* as follows

```
python3 run.py [-h] --input INPUT [--output OUTPUT] [--verbose]
```

Arguments

1. **INPUT** - This is the location of the input python file, this is a mandatory argument.
2. **OUTPUT** - This is the location of the output PDF file, this is an optional argument.
3. The **--verbose** flag gives the detailed trace of construction of the tree.

The **-h** option can be used for help in running the script.

Relevant Details

Tabs are not converted to spaces in the program, and will lead to syntax error.

Tools used

1. GNU Bison
2. Flex
3. GCC
4. python (for CLI)
